**(Enterprise Resource Planning Software)**

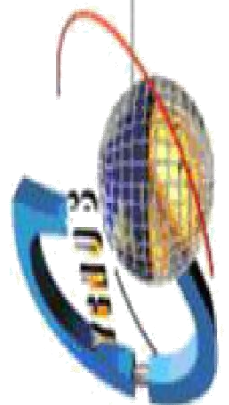

## Providing Customized ERP Solutions to Enterprises

Cygnus Innovation's XENTERPRISE (Enterprise Resource Planning Software) solution is customized ERP application which enables the management team to establish and retrieve all the information related to a company's workflow. This state of the art data delivery application provides a wide range of Enterprise Information including in modular form: Purchase, Sales, Stock & Inventory, Commercial, HRM, Finance/Accounting, CRM/Sales, Production, Billing, and Security. Other features include Interactive Dynamic Charts (historical, comparative, analytical and interactive), Statistical Reports, Asset Allocation, and much more. Each of these modules are stand alone products as well, with the reliability and depth built in. Deployed and customized according to your industry needs this application will generate all functionalities for a comprehensive IT strategy for your firm.

XENTERPRISE can be deployed in a modular integrated form so that additional future functionality and features can be easily added. The software not only supports transaction, inventory and accounts management but also utilizes a multi-level security scheme. The system features a user friendly interface, a convenient analytics subsystem, a transaction history subsystem and an easy-to understand terminology.
