

BROKERAGE BACK OFFICE SOFTWARE

Uniform Broker Back Office Software

X-BROKER

BROKER HOUSE SOLUTION

Leading Brokerage Back Office Software in Bangladesh

Cygnus Innovation's XBroker solution is a Stock Exchange Broker Back office application which enables the management team to establish and retrieve all the information related to instances, clients, accounts, trades in real time. It also provides historical transactions and detailed reports of each transaction. This state of the art market data delivery application provides a wide range of market information including Streaming Stock Quotes, Interactive Dynamic Charts (historical, comparative, analytical and interactive), Statistical Reports, Portfolio, Company News, Market Indices and much more.

X Broker software package is not only able to receive and process trade & transactions, but also to work with a substantial number of user accounts. The system features a user friendly interface, a convenient analytics subsystem, a transaction history subsystem and an easy-to-understand terminology.
